Harsh Taunk

+91 7987970629 — harshtaunk111@gmail.com — LinkedIn

Summary

Product professional with a strong product-design background, experienced in 0→1 product discovery, requirements, workflow definition, stakeholder collaboration and cross-functional execution across AI, healthcare, legal-tech, manufacturing and IoT products.

Education

Indian Institute of Information Technology (IIIT) Vadodara **Dec 2021 – June 2025**
Bachelor of Technology in Computer Science & Engineering *CGPA: 7.22*

Experience

DriveIT Technologies — Product Designer **Jan 2026 – Present**

Regency Ceramics

- Redesigned a multi-product ecosystem spanning the **website, CMS, manufacturing tablet app, plant command center, and training content**, structuring information for **6,000+ tile products** to improve product discovery, content management, and scalability.
- Conducted **2 factory visits** to observe manufacturing workflows and translated on-ground processes into practical tablet experiences for non-technical users, strengthening client confidence and contributing to securing the engagement.
- Collaborated with business stakeholders, engineers, and **3rd-party integration vendors** across requirements, planning, documentation, prototyping, implementation, and QA, resolving workflow and integration gaps while maintaining product consistency.
- Applied a user-first, technology-driven approach to product design, exploring **Figma, Claude Design, Claude Code, and Google Stitch** to accelerate ideation, prototyping, documentation, and design-to-development workflows.

HealthOrio

- Designed core workflows for an **AI healthcare platform**, covering medical report upload, OCR extraction, AI summaries and insights, medical history, appointments, vaccination, family management, and report sharing.
- Defined information architecture, user journeys, and edge cases for complex **AI and healthcare workflows**, balancing usability, privacy, technical constraints, and clarity of AI-generated information.

Niraapadh

- Conducted **UX audits and product testing** across the existing experience, identifying usability, interaction, and visual inconsistencies and translating findings into actionable improvements.
- Worked with the team to refine the product's **UX and UI**, improving consistency, usability, and overall product quality across key workflows.

Web-nyay — Product Design Intern **Jan 2025 – June 2025**

- Designed **bulk case management and arbitration workflows**, converting complex manual legal processes into structured digital flows for **bulk upload, case management, notice issuance, and arbitrator empanelment**.
- Contributed to **DocChat**, an AI-assisted legal research product, designing document and conversational workflows to make complex legal information **easier to search, understand, and act on**.
- Conducted competitive analysis across **LexisNexis, CoCounsel, AskJunior, Sarvam, Harvey, and Leya**, identifying product patterns and gaps that informed **feature and UX decisions**.

Laathi – IIT Delhi Project — UI/UX Intern **Aug 2024 – Sep 2024**

- Reorganized **100+ screens** across the product, identifying and eliminating duplicate workflows to create a clearer and more scalable information architecture.
- Standardized reusable **UI components and interaction patterns** and uilt an **end-to-end interactive prototype** to connect redesigned workflows and demonstrate the complete product experience.

Canyfix — UI/UX Intern **Feb 2024 – July 2024**

- Designed **3 role-based mobile applications** for Customers, Partners, and Vendors, streamlining the end-to-end device repair journey from **issue selection and appointment booking to repair management and payment**.
- Translated complex multi-party repair workflows into structured product experiences, enabling **appointment prioritization, vendor assignment, pricing, status management, and payment flows** across the ecosystem.
- Established consistent **UX patterns and reusable components** across multiple role-based products, improving workflow clarity and creating a scalable foundation for the Canyfix product ecosystem.

Bayleaf Technologies (formerly Garudam) — UI/UX Intern **Jun 2024 – Jul 2024**

- Designed core workflows for an **IoT-based vehicle tracking platform**, enabling real-time visibility through **live tracking, geofencing, trip timelines, and SOS workflows**.
- Designed experiences across **multiple user groups**, translating complex tracking and safety requirements into intuitive workflows for administrators, drivers, and parents.
- Structured information architecture and interaction flows for **real-time vehicle monitoring and incident management**, improving clarity across tracking, alerts, and trip-related workflows.

Certifications

Mastering Product Management 2.0 by Shravan Tickoo **Certificate**

Google UX Design Professional Certificate **Certificate**

Leadership & Impact

Google Developer Student Club — UI/UX Lead **Jul 2023 – May 2024**

- Led **UI/UX learning initiatives for 100+ students**, organizing and delivering workshops on **Design Thinking and Figma** to build practical product design skills.

Cultural Committee, IIITV — Core Team Member **Oct 2022 – Oct 2023**

- Coordinated execution of the institute's inaugural cultural festival with **12 events and 500+ participants**, working across logistics, planning, and cross-functional teams.

Vector Club, IIITV-ICD — Design Lead **2023 – 2024**

- Led the club's **design and visual communication efforts**, creating social media content and maintaining a consistent visual identity across all the club initiatives and events.

Skills

Product Product Discovery, User Research, Competitive Analysis, Workflow Design, Stakeholder Management, Information Architecture

Design Figma, FigJam, Design Systems, Interaction Design, Heuristic Evaluation, Wireframing, Prototyping,

Tools Figma, FigJam, Canva, Claude Design, Claude Code, Google Stitch
